BRIEFS

Take extra pre-cautions around fireworks

Though certain types of sparklers
and fireworks have been legalized there
remains an inherent danger, especially
for amateurs.

The National Fire Protection Associ-
ation reports sparklers caused about 28
percent of firework related injuries in
2014. Sparklers burn near 2,000°, similar
to a blowtorch.

The Fireman's Association of the
State of New York (FASNY) stated,
"Fireworks should only be used by pro-
fessionals who have undergone training
and certification." This is especially

true for the Fourth of July.

In 2015, the U.S. Consumer Product
Safety Commission reported 67 per-
cent of all injuries related to fireworks
occurred around or during July 4.

Sparklers injured 65 percent of those
injured who were younger than five.
Extra caution could lead to less of these
accidents.

In an effort to remain safe and avoid
injuries, FASNY hopes people attend the
safe and professional firework displays
that occur across the state.

Steering clear of motorcycles and accidents

During summer many more motorcy-
cles are on the road. Motorists should
take extra care around motorcyclists.

Nassau County officials advise driv-
ers to watch carefully for motorcycles
when changing lanes or turning
because motorbikes can easily hide
behind various objects such as bushes
and a car's blind spot.

Motorcyclists often decelerate by down

shifting, which does not activate brake
lights. Also, motorcyclists may adjust
their position within a lane due to condi-
tions such as weather, but this does not
mean they're changing lanes.

In 2016, there was a total of 362 motor-
cycle accidents, 205 of which occurred
between May 1 and Aug. 31. Being more
aware of motorcyclists could help to
reduce those numbers.
